Greetings!

**Over Four Hundred Years and We’ve Not Yet Achieved Our Most Basic Principle**

The founders stated that all “men” are created equal, but they fudged when it came to black men and from that oppressive patriarchal stance, privileged white men built into our most essential structural DNA a sin that has still not been cleared from our national soul. This system for maintaining white male power was used to practice genocide on native Americans, to oppress women, many European-new comers to the US, all people of color and those who are gay, lesbian or gender nonconforming. It is my hope that the unjust and unpunished murders and oppression of any group of human beings will one day end. But for that to happen all people must do their part.

Hope is hard to maintain given the 38 well documented and highlighted murders of black people since 2014. Although this count begins with 12-year-old Tamir Rice in 2014 and ends with George Floyd, two weeks ago, there are thousands of others over centuries who remain hidden, unnamed or unrecognized. History proves that without justice there can be no peace. I align with all people calling for justice and I see food justice as part of the continuum.

I invite you to help in the process of making amends for our nation’s original sin by offering some financial support to one of the organizations linked below. All are working to achieve true equality, our nation’s most basic principle. I also invite you to take in the messages offered in the **Deepen Your Knowledge** section below. These messages are not always comfortable to hear and yet
they are essential to be heard and understood with an empathic heart. For this is how the healing will begin. (photo credit: Fibonacci Blue/Flickr)

I concur with Ms. Renkl's statement that as a nation proclaiming to be
Christian, “our sins are grievous, but we are not yet beyond redemption.”
